```

49. **Error** End of file seen and there were open elements.

[From line 36, column 1; to line 36, column 7](#)

```
></html></head>
```

Document checking completed.

Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

No textual alternative available, not linked

The following images are not links and have no textual alternative available (no `alt` attribute), and are, therefore, not accessible to people who cannot see the images or understand the symbols in them.

An image belongs here if the image is significant (non-decorative) and the markup generator doesn't have knowledge on what the image is about available. For example, a photo gallery generator does not have textual alternatives available when the user refuses to provide them.

Purely decorative images should have the empty string as the textual alternative (`alt=""`), so it is a mistake for those to appear here. Also, when the markup writer knows what the images are about, (s)he should write textual alternatives.

Image	Location
Not resolvable	From line 30, column 3; to line 30, column 29

Images with textual alternative

The following images have textual alternatives. Please review that the textual alternatives make sense considering the purpose of the image in the context of the page and that phrases like "Image of ..." are avoided.

Note that iconic images that are redundant with text next to them or purely decorative should have `alt=""` instead.

Image	Textual alternative	Location
Not resolvable	Avi	From line 31, column 3; to line 31, column 39
Not resolvable	Spencer	From line 32, column 3; to line 32, column 62
